

PRATIKSHA KALBHOR

Blockchain & Web3 Developer | Solidity | Smart Contracts | React.js

Pune, Maharashtra | 7030029291 | kalbhorpratiksha333@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Third-year B.Sc. Blockchain Technology student (CGPA 8.75) with hands-on experience building and deploying decentralized applications using Solidity, Rust, Soroban, React, and MongoDB. Independently built four end-to-end blockchain projects — spanning document verification, NFT marketplaces, carbon-credit tracking, and decentralized freelancing — across both Ethereum and Stellar ecosystems. Completed the Stellar Journey to Mastery program (Rise In & Stellar). Seeking a Blockchain/Web3, Smart Contract, or React.js internship to contribute to production-grade DApps.

TECHNICAL SKILLS

Blockchain & Smart Contracts: Solidity, Smart Contract Development, Ethereum, Stellar, Soroban, Rust, MetaMask, Remix IDE, Web3, DApps

Frontend: JavaScript, React.js (in progress), HTML5, CSS3

Backend & Database: Go, MongoDB, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Vercel

Currently Learning: React.js (advanced), Hardhat, Smart Contract Auditing, DeFi, Blockchain Interoperability, Tailwind CSS

PROJECTS

Stellar NFT Marketplace | DApp

- Engineered a decentralized NFT marketplace on the Stellar network using Soroban smart contracts, supporting NFT minting, listing, and trading.
- Integrated wallet-based authentication for secure, on-chain user transactions.
- Built the marketplace interface in React for wallet connection and NFT browsing/trading.

Tech Stack: Rust, Soroban, React, Stellar SDK

DataProof | Blockchain-based Document Verification System

- Developed a decentralized certificate verification system using Solidity smart contracts, removing dependency on centralized verifying authorities.
- Implemented SHA-256 document hashing to create tamper-proof, verifiable records on-chain.
- Integrated MetaMask authentication for secure, wallet-based user login.

Tech Stack: Solidity, React, MongoDB, Go, MetaMask

EcoChain | Blockchain-based Carbon Credit Platform

- Designed a blockchain platform to track tree-plantation activity and manage carbon credit issuance with full transparency.
- Built smart contracts to record and verify carbon credit transactions immutably on-chain.

Tech Stack: Solidity, React, MongoDB, Go

FreelanceChain | Decentralized Freelancing Platform

- Built a decentralized freelancing platform enabling direct wallet-based transactions between clients and freelancers, removing intermediaries.
- Implemented Soroban smart contracts to handle secure, milestone-based payments.

Tech Stack: Rust, Soroban, React

EXPERIENCE

Blockchain Development Trainee — Stellar Journey to Mastery — Rise In & Stellar 2026

- Completed an intensive 3-month blockchain development program focused on Soroban smart contracts and Web3 application architecture.
- Built and deployed blockchain applications using Git, GitHub, and Vercel within a cohort-based, project-driven curriculum.
- Gained hands-on, early-adopter experience in the Stellar/Soroban ecosystem — a differentiator over Ethereum-only candidates.

EDUCATION

B.Sc. in Blockchain Technology — Savitribai Phule Pune University

2024 –Expected 2028| CGPA: 8.75

CERTIFICATIONS

- Stellar Journey to Mastery (3-Month Blockchain Development Program) — Rise In & Stellar, 2026
- The Complete Full-Stack Web Development Bootcamp — Udemy, 2025
